

How To Make Transparent Image in GIMP

1. Open image;
2. Select area to be made transparent:
 - Tools, Selection Tools, (usually "By Color Select" or "Fuzzy Select)
 - Click region to be selected,
 - Use shift-click to add more regions/colors;
4. Select: Layer, Transparency, Add Alpha Channel.
5. Select: Edit - Clear (makes the selection transparent);
6. Save or Export file.
